Yu, J. A conceptual framework for agent-based agile manufacturing cells, 93

Keyword index

adoption, 265
agent-based system, 93
agile manufacturing cell, 93
agile systems development, 237
automotive industry, 295

benefits, 131
BPR, 111

canonical action research, 65
China, 153
competence, 313
computer ethics, 387
concurrent engineering, 169
control, 131

data mining, 43
Delta Model, 111
diffusion of innovations, 265

e-business, 23, 111
e-commerce, 23
empirical study, 295
ERP challenges, 153
ERP implementation, 153
evaluation, 131
expert, 313

food industry, 111

grounded theory, 363

health care, 343

information system, 313
information systems development process, 363
information systems implementation, 343
information technology, 169
information technology investments, 43
integrated product development, 169
interaction mechanism, 93
Internet speed, 237
Internet standards, 265
Internet time, 237
Internet, 265
internet-based system for production, 169
interorganizational, 131
interpretivism, 65, 198
IPv6, 265
IS ethics, 387
IS research, 198

Kohlberg's theory of moral development, 387

management control, 343
MARS, 43
meta-analysis, 65
methodology, 363

organizational change, 65
organizational development, 3
organizational implementation, 3
organizational learning, 65

paradigms, 198
partial adoption, 265
performance, 23
positivism, 198
power, 343
process innovations, 3
